Packers trade up to bolster defensive line

Press-Gazette

The Green Bay Packers wanted to add a promising defensive lineman, and they made a pro-rated trade Saturday morning to make sure they could get one.

"I've been a really trying day," Holdiday said. "The slow side from the economic standpoint. But the upside is playing for a transitional organization with a great tradition, and I know that year in and year out I'll be competing for championships."

Apparently, one defensive lineman wasn't enough. The Packers compensated their 1997 first-round draft pick, Vince Holdiday, with a second-round pick to the Miami Dolphins.

"I know he can play defensive tackle," general manager Ron Wolf said. "If he can play outside defensive end, that's a plus. But we have taken a great step forward today in putting the pieces of the puzzle together again."

Holdiday collected at No. 19 overall.

Transactions defensive end Jonathan Brown with their third-round pick, the 60th overall.

The Holiday selection was over top of the Packers' Hall of Famer Darrin Paul.

Mike Oberst of Madison didn't expect the highly touted lineman to drop to the Packers' slot.

"I'll give you the kind of pick he is about a year," Oberst said. "They got a good draft if he's wearing a ring on his finger next year."

Browns four through seven take place today. The Packers are expected to look at showing a defensive back or two and possibly a quarterback 1997 of the draft by picking back.

Oconto Falls bar fight ends in man's death

Special report

Superfund status weighs heavily on Fox

Decision by EPA on listing draws near

By Susan Campbell
Press-Gazette

Fox River committee from Lake Winnebago to Green Bay may soon be in a master of weeks away from the list that made them may soon join the ranks of Superfund sites across the nation.

A decision by the U.S. Environmental Protection Agency to propose Superfund designations for the Fox River would trigger re-evaluations throughout the region for years to come. Superfund designation would provide government funds to clean the river, but also could levy penalties on companies that pollute the river for the contamination.

EPA committee on the listing could bankrupt some mills along the river's shores. Proponents say it would speed the start of the last mile in a 12-year effort to restore the pollution of the river.

Caught in between in the public — a forgotten middle child that nonetheless has a considerable stake in the health of the river that flows through the community.

If the Fox River is proposed for listing on the National Priorities List as expected this summer, the public will have 60 days to register an opinion about whether it favors or opposes the idea.

What is hot today are aqueous.

Please see FOX/A-2

The police interviewed 34 different witnesses, Conley said. "There was alcohol. This happened in a bar at 2 a.m., and bar close at 2:30. There were a lot of different things said."

James L. "Sam" Gresten of Beaver Lake Road in Oconto Falls was taken to Oconto Falls Community Hospital after a fight on the second floor of Mercer's Oconto Falls Hotel & Sports Bar, 172 1/2 Main Street.

Police said Gresten was not breathing and did not have a pulse when rescue crews arrived. He was pronounced dead by doctors at the hospital at about 5:45 a.m.

Oconto County District Attorney Jay Conley said he plans to charge a 21-year-old Oconto Falls man with second-degree homicide.

"This is a bar fight with an alleged victim in a death because of it," Conley said Saturday. "I have a complaint prepared, and I expect the Oconto county attorney to file it Monday."

Conley said witnesses reported that Gresten was beaten repeatedly before losing consciousness. Patterns on the bar offered several reports of what happened with the fight, but Conley said it might have lasted over a game of pool.

Gresten is survived by his wife, Penny Gresten, and four children.

Green Bay's buildings mirror area's growth

Gothic church, Lambeau Field among architects' favorites

By Jim Kneisel
Press-Gazette

A lot of costly, historic and high-profile work went into building the First Evangelical Lutheran Church. In 1905 when restaurateur Otto Kay decided to donate a new church building to his religious family, he spent no expense. Through it's not built on a grand scale, the sanctuary at 741 S. Monroe Ave. features architectural details reserved for the mansions of kings and presidents. Intricate stone carvings of the

Apollonia surrounded the massive central wooden entry doors. Vividly colorful stained-glass windows are among the best Italian marble with a carved ivory base.

"Otto Kay's church" is one of the finest buildings in Green Bay, according to architect Michael Radwin of Roseville's Associates, 2100 Riverside Drive.

"It is a masterpiece of Gothic-Lutheran style design, probably the finest in Green Bay in terms of architecture," Radwin said. "He

pretty much took his candy fortune and put it into that church. The church was one of a number of major public works in industrial Green Bay (Sequoyan-era) favorite buildings. While they all gathered about the Brown County Courthouse and other obvious landmarks, the architect also presided a small restored home, the modern University of Wisconsin-Green Bay Student Union and Lambeau Field.

The survey shows an architectural diversity spanning the slow, steady growth of the area.

Green Bay's architectural heritage is linked directly to advances in transportation and the ebb and flow of the national economy.

To factor out where settlers built homes and businesses, look at how they and their possessions arrived. If you want to know when that most famous evening went on, check about when the people had money.

The first wave of pioneer transport and people built Green Bay and Victorian houses, hotels and mansions.

BACK IN TIME

Architecture facts

- The biggest and tallest of any Green Bay building on the east bank is the First Lutheran Church built hundreds of years ago in 1905.
- Architectural residents continue to build outward into the suburbs.
- Green Bay building booms followed economic good times. Very few houses were built during the Great Depression and World War I.
- Local legend has it that much of the best revision of the Wisconsin Constitution was crafted at Hagedorn Historic Home.
